

# Estimator – Munster Region

We are currently seeking an Estimator for a full-time permanent position based in the Munster region.

The role will involve the preparation of competitive tenders for multi-million-euro civil engineering projects. You will be responsible for analysing drawings, specifications, and tender documents to develop accurate cost estimates. The position will include close collaboration with the commercial and operations teams to ensure robust, competitive and commercially sound bids.

You will work within an experienced bid winning team and typical duties will include pricing civil works, subcontractor enquiries, quantity take-offs, risk identification, and preparing tender submissions. The role will be varied, with exposure to a wide range of civil engineering projects including roads, water infrastructure, and general civil works.

## The Candidate:

- Candidates with both long-term and short-term experience will be considered
- Must hold a BSc Degree in Quantity Surveying, Construction Economics, Civil Engineering or similar
- Must have minimum 3 years' experience in an estimating, QS or commercial role in Ireland or the UK
- Must have strong numerical and analytical skills with excellent attention to detail
- Must be highly proficient in MS Office, particularly Excel
- Must have strong written and verbal communication skills
- Must demonstrate ability to work to tight deadlines in a high-pressure tendering environment
- Preferably have experience in civil engineering estimating and tender preparation
- Preferably have knowledge of Irish construction contracts and procurement practices
- Preferably be familiar with measuring software and estimating systems

## What is on Offer:

- Competitive salary for the right candidate
- Pension benefits
- Annual bonus
- Excellent career progression opportunities
- Training & CPD support
- Excellent location
- Opportunity to work on large infrastructural projects as part of a wider commercial team

## Experience:

- Minimum 3 years estimating or commercial experience in Ireland or the UK
- Experience in civil engineering projects
- Experience in roads, drainage, water or wastewater infrastructure (preferred)
- Experience working with subcontractor pricing and tender analysis (preferred)
